ERRATUM #3

**Request for Proposal # 4998.1
Consultant for School Boundary Review for Montgomery County Public Schools**

The above referenced Request for Proposal is hereby revised to reflect the following:

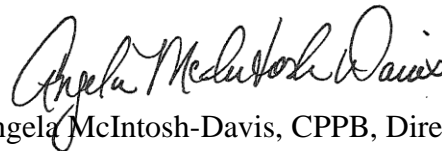

1. The DUE DATE for this captioned RFP is hereby extended until October 22, 2024 at 2:00PM. Please refer to the submission requirements in the RFP documents for details.
2. To provide further clarification to the specifications and scope of the review, please note the following information:
 - a) Valid projections exist for current elementary, middle, and high school attendance zones for each corresponding grade levels, i.e. elementary schools are projected for grades pk-5, middle schools for grades 6-8, and high schools for grades 9-12. Review is for understanding the magnitude of potential changes that need to occur so that schools that are crowded have relief by the new attendance zones, and schools with space are utilized more fully.
 - b) Projections will need to be developed for geography being reassigned in options at the grade levels potentially being affected. For example, if the geography of an elementary school attendance area is being reassigned in an option at the middle school level then grade 6-8 projections will need to be developed for that geography. The same is true for any geography smaller than an existing attendance zone at any level. There is no need to redo grade level projections that already exist.
 - c) Offerors interested in submitting a response require experience with committee facilitation, this will include the community engagement process.
 - d) MCPS does want a special program placement analysis completed.
 - e) The offeror should determine and include in their submission the proposed number of required meetings, as well as specify whether they plan to attend these meetings virtually or in person.

All other language, terms and conditions of the RFP remain unchanged.
