NOTICE TO OFFERORS

**The following is an update to questions and responses dated January 18, 2023 for
RFP# 6808.1 Integrated Web-based Student Transportation Routing and GPS Tracking System**

Please refer to the original Q&A document for the initial question.

UPDATED RESPONSES:

Question 8: In cases where other routes may have to transport a student because the assigned bus is unable to, we would need the ability to temporarily place them on the temporary route to track and inform parents.

Question 9: The reference to IAQ is hereby removed from the RFP.

Question 26: MCPS has four tiers...High School, Middle School, 1st tier Elementary School and 2nd tier Elementary School. Most routes have all four tiers, and some less, and it is dependent on the length of the route.

Question 36: We transport, on average, 102,000 students daily. Approximately 7,800 are special education students.

Question 54: We are looking for light duty GPS that will be able to be easily installed/removed. Currently, we are not looking at recording data for vehicle diagnostics. To start, we will simply use GPS for bus tracking and parent app communication
