**Report on the Spring 2003 Comprehensive Tests of Basic Skills (CTBS), Grade 4,
and TerraNova California Achievement Tests (CAT), Grade 6**

Systemwide results of the spring 2003 administration of the TerraNova Comprehensive Tests of Basic Skills (CTBS) in Grade 4 and the TerraNova California Achievement Tests (CAT) in Grade 6 continue to be well above the national average.¹ Grade 4 students showed a seven-point increase in mathematics and a nine-point increase in mathematics computation, while maintaining last year's results by scoring at or above the 67th national percentile in reading, language, and language mechanics. The improvements in mathematics were particularly impressive. The increases in mathematics placed students at the 78th national percentile in mathematics and at the 80th national percentile in mathematics computation. This is the first time that Grade 4 students reached this level of performance in mathematics, and the first time they achieved at the 80th percentile in any of the CTBS subject areas. Grade 6 posted results that were in line with last year's results in four of the five subject areas. Mathematics computation showed a decline. While additional analysis of the data is in progress to understand this decline more clearly, the overall Grade 6 results continue to be higher than the 2001 results and above the national average, with all subject areas surpassing the 60th percentile nationally.

**Table 1
2001–2003 Median National Percentile Ranks for the Nation and
the Montgomery County Public Schools, Grades 4 and 6**

Grade	Subtest	Median National Percentile Rank			
		Nation	MCPS		
			2001	2002	2003
4	Reading	50	67	67	67
	Language	50	74	74	74
	Mathematics	50	71	71	78
	Language Mechanics	50	68	75	75
	Mathematics Computation	50	71	71	80
6	Reading	50	64	66	66
	Language	50	63	66	66
	Mathematics	50	72	72	72
	Language Mechanics	50	60	65	65
	Mathematics Computation	50	60	70	62

Note: The median is the middle score of a group. That is, half of the scores are above it and half are below. Thus, if the median national percentile rank for a group of local students is 78, one can then say that half of the students in the local group outperformed 78 percent of students in the national reference group.

This systemwide high performance occurred during a period of rapid increase in the number of students likely to be most academically at risk because of poverty and, especially, limitations in English language skills. Compared with last year, there was a 44 percent and a 26 percent

1. The CTBS and CAT are components of the TerraNova series of assessments published by CTB/McGraw-Hill. The CTBS and the CAT were normed nationally in 1996 and 2000, respectively.

increase in the percentage of students tested who were in need of English language services in Grades 4 and 6, respectively (see Attachment A). Generally, when the number of students participating in testing increases, the overall group performance goes down. Yet, Grade 4 students receiving English for Speakers of Other Languages (ESOL) services lifted their performances at or above the 40th percentile in all subject areas—the highest ever in reading and mathematics, while Grade 6 ESOL students maintained their scores in all subject areas (see Attachment D).

Results by Race/Ethnicity

Results for all racial/ethnic groups were generally better in Grade 4 than in Grade 6, with Asian American and White students scoring higher than African American and Hispanic students at both grade levels (see Attachment B).

At the fourth-grade level, African American, Asian American, and Hispanic students showed gains. African American students exceeded the national average in language mechanics and mathematics computation (53rd percentile), and were within one point of the national norm in reading and language (49th percentile). Asian American students, like their African American peers, increased their scores in three of the five CTBS subject areas, with all subject areas at or above the 75th percentile. Most impressive was the performance of Asian American students in mathematics computation at the 94th percentile, the first group of students ever to achieve such a level. This is also the first time that any systemwide score in Grade 4 has reached the 90th percentile. Hispanic students are above the national average in mathematics, language mechanics, and mathematics computation (53rd percentile), and one point shy of being at the national average in reading and language. White students maintained their scores, with all subject areas at or above the 80th percentile.

Results at the sixth-grade level were mixed. African American and Asian American students maintained their performance in all subject areas, except for a seven-point decline in mathematics for African American students (39th percentile) and in mathematics computation for Asian American students (77th percentile). Hispanic students showed a nine-point gain in language mechanics (55th percentile) and three- to eight-point drop in reading, mathematics, and mathematics computation. White students had a nine-point gain in language mechanics (82nd percentile), maintained in reading, language, and mathematics, and dropped seven points in mathematics computation (70th percentile).

Results by Gender

Gender differences in performance in Grades 4 and 6 tended to favor female students over male students. In relative terms, female students performed best in reading, language, and language mechanics, while male students performed best in mathematics. Grade 4 male students reached the 80th national percentile in mathematics computation—their highest ever (see Attachment C).

Results by Special Services

ESOL students in Grade 4 showed improvements in all subject areas (see Attachment D), including a 13-point increase in mathematics (42nd percentile), an 11-point increase in reading (40th percentile), and improvements ranging from 5 to 7 points in the other subject areas. ESOL students in Grade 6 maintained their previous year's results. As mentioned above, these performances took place within a period of steady growth in the number of students tested with English language needs. In spring 2003, there was a 44 percent increase in the percentages of ESOL students tested in Grade 4 and a 26 percent increase in Grade 6 relative to the percentages of ESOL students tested in spring 2002.

Grade 4 students receiving Free and Reduced-price Meals System (FARMS) and Special Education services showed improved results in reading, language, and mathematics, and maintained in language mechanics and mathematics computation (see Attachments E and F). Grade 6 students receiving these services experienced a decline in mathematics computation of about eight points. Students receiving FARMS services also experienced a six-point decline in reading (38th percentile). The participation rate of students receiving FARMS services increased by about 2 percent in Grades 4 and 6, respectively, from 2002 to 2003 (see Attachment A).

Results by School

More than 80 percent of the elementary and middle schools scored at or above the national average in all of the subject areas. More than 90 percent of elementary schools reached this level in three subject areas, while a similar percentage of middle schools reached this level in four subject areas. Table 2 summarizes these results.

Table 2
Number and Percentage (%) of MCPS Schools Scoring at the
50th Median National Percentile and Above

Subtest	Grade 4 (119 schools)		Grade 6 (38 schools)	
	Number	%	Number	%
Reading	105	88	35	92
Language	104	87	35	92
Mathematics	108	91	35	92
Language Mechanics	109	92	35	92
Mathematics Computation	108	91	32	84

A substantial number of schools earned a median national percentile rank of 75 and above, particularly at the elementary school level. Such a performance placed the average students in these schools among the top 25 percent in the nation. As illustrated in Table 3 below, more than half of the elementary schools reached this level of performance in mathematics, language mechanics, and mathematics computation, while about one-fourth of the middle schools scored at this level in all subject areas.

Table 3
Number and Percentage (%) of MCPS Schools Scoring at the
75th Median National Percentile and Above

Subtest	Grade 4 (119 schools)		Grade 6 (38 schools)	
	Number	%	Number	%
Reading	57	48	9	24
Language	47	39	11	29
Mathematics	65	55	12	32
Language Mechanics	61	51	9	24
Mathematics Computation	60	50	8	21

Attachment F presents median percentile ranks for individual schools.

Results of Nonstandard Administrations

The national normative data for the TerraNova CTBS and CAT are based on the performance of students who took these tests under standardized conditions. Students can take the mathematics computation subtest with a calculator if that accommodation is specified in their Individualized Education Program or Section 504 Plan. A total of 512 students in Grade 4 and 611 students in Grade 6 used this accommodation (about 5 percent of the students who took this subtest at these grade levels). Their median percentile ranks were 62 and 46, respectively.
