MONTGOMERY COUNTY PUBLIC SCHOOLS
Rockville, Maryland

June 2, 2003

MEMORANDUM

To: Members of the Board of Education

From: Jerry D. Weast, Superintendent of Schools

Subject: First Semester Final Examination Results in Five Courses

Attached is a report that summarizes the performance of students on semester 1 final examinations in January 2003 in five subjects. The courses are Algebra 1, Geometry, Biology, English 1 (ninth grade), and National, State, and Local Government (NSL).

The key findings in the report include the following:

- In high schools, the passing rates on final examinations in semester 1 were highest for English 1 (86 percent) followed by NSL (77 percent), Geometry (69 percent), Biology (60 percent), and Algebra 1 (50 percent). These passing rates were, with the exception of Algebra 1, at least 2 percentage points higher than those from one year earlier. Note that many Grade 9 students had already passed the algebra test as eighth graders.
- In middle schools, the passing rate among students taking Algebra 1 was 93 percent, and among students taking Geometry, the passing rate was 98 percent.
- Students who are better prepared academically tend to enroll in mathematics and science courses earlier and to perform better on final examinations than those who enroll in the same courses in higher level grades.
- Final examination passing rates for African American and Hispanic students were one-half to two-thirds as high as the passing rates of white and Asian American students, depending upon the course.

The report includes districtwide and school results disaggregated by gender, by race/ethnicity, and for students receiving special services including participation in Free and Reduced-price Meals System, English for Speakers of Other Languages, and special education.

I will continue to keep you informed.

Final Examination Performance in Five Selected Courses, January 2003

Overview

The purpose of this report is to summarize the performance of students on semester 1 final examinations in January 2003, in five subjects. The courses are Algebra 1, Geometry, Biology, English 1 (ninth grade), and National, State, and Local Government (NSL).

A review of these findings suggests the following conclusions:

- In high schools, the passing rates on final examinations in semester 1 were highest for English 1 (86 percent) followed by NSL (77 percent), Geometry (69 percent), Biology (60 percent), and Algebra 1 (50 percent). Note that many Grade 9 students had already passed the algebra test as eighth graders. These passing rates were, with the exception of Algebra 1, somewhat higher than those from one year earlier.
- In middle schools, the passing rate among students taking Algebra 1 was 93 percent, and among students taking Geometry, the passing rate was 98 percent.
- Students who are better prepared academically tend to enroll in mathematics and science courses earlier and to perform better on final examinations than those who enroll in the same courses in higher level grades.
- Final examination passing rates for African American and Hispanic students were one-half to two-thirds as high as the passing rates of white and Asian American students, depending upon the course.

The summaries attached to this report include the following groups of students:

- Countywide results for high school students enrolled in the five courses, including details for racial/ethnic group, gender, grade level, Free and Reduced-price Meals System (FARMS), English for Speakers of Other Languages (ESOL), and special education students (Attachment 1).
- Results for each high school (Attachment 2).
- Results for each high school, including details for racial/ethnic group, gender, grade level, FARMS, ESOL, and special education students (Attachment 3).
- Countywide results for middle school students enrolled in the five courses, including details for racial/ethnic group, gender, grade level, FARMS, ESOL, and special education students (Attachment 4).
- Results for each middle school (Attachment 5).
- Results for each middle school, including details for racial/ethnic group, gender, grade level, FARMS, ESOL, and special education students (Attachment 6).

Detailed Findings

The data in Table 1 show the overall final examination passing rates for all students taking final examinations in the respective courses. That figure was highest in English 1 (86.3 percent) and lowest in Algebra 1 (50.4 percent). Total passing rates for NSL (77 percent), Geometry (68.6 percent), and Biology (59.6 percent) fell between those two extremes. These passing rates were, with the exception of Algebra 1, at least 2 percentage points higher than those from one year earlier.

Table 1

Percentages of High School Students Passing the Final Examinations in Five Courses, January 2003 Compared to January 2002.

	Algebra 1A*	Geometry A	Biology A	English 1A	NSL A
January 2003	50.4%	68.6%	59.6%	86.3%	77.0%
January 2002	50.2%	58.1%	51.5%	84.0%	70.8%

* Algebra 1 students exempted from final exams are excluded

Note that some students enrolled in Algebra 1A (13.3 percent) were exempted from taking the Algebra 1A final examination. In the other four courses the percentages of students exempted from the final examination systemwide were less than 2 percent. The number of high schools that exempted 9 percent or more of their Algebra 1A students rose from two high schools in 2002 to eight high schools in 2003. Several high schools have started a new “Extended-time Algebra Program.” Students in that program are allowed more time throughout the next semester to master the material from Algebra 1A, and are thus exempted from taking the first semester’s final examination until the teacher deems it appropriate.

Detailed results for racial/ethnic groups in the high schools showed that the percentages of African American or Hispanic students that passed the final examinations were 20 to 40 percentage points lower than those for Asian American and white students, depending on the subject matter (see Table 2).

Table 2
 Passing Rates Among High School Students Taking the Final Examinations in
 Five Courses for Semester 1, January 2003

		Algebra 1A*	Geometry A	Biology A	English 1A	NSL A
Asian American	% Passed	61.7%	80.2%	73.8%	94.3%	85.3%
	Number Tested	520	1,367	1,505	1,461	1,655
African American	% Passed	37.5%	48.6%	36.4%	74.4%	64.1%
	Number Tested	1,715	2,164	2,362	2,208	2,500
White	% Passed	64.9%	83.0%	76.4%	94.1%	88.9%
	Number Tested	2,244	4,883	5,203	5,279	5,443
Hispanic	% Passed	38.2%	46.7%	32.7%	72.6%	57.7%
	Number Tested	1,339	1,657	1,750	1,433	1,758
TOTAL	% Passed	50.4%	69.3%	60.2%	87.0%	78.1%
	Number Tested	5,818	10,071	10,820	10,381	11,356

* Algebra 1 students exempted from final exams are excluded.

Virtually all of the students taking English 1 were ninth graders (99 percent, see Table 3). The Biology and NSL courses were comprised predominantly of tenth graders (71 and 82 percent respectively). The Algebra 1 enrollments in high school were primarily ninth graders (73 percent), although one out of four of the Algebra 1 students in high schools was above ninth grade.

Table 3
 Grade Level Composition of Course Enrollments in High School
 For Semester 1, January 2003

		Algebra 1A*	Geometry A	Biology A	English 1A	NSL A
Grade	9	73%	41%	21%	99%	6%
	10	19%	37%	71%	1%	82%
	11	7%	14%	6%	0%	6%
	12	1%	8%	3%	0%	6%
TOTAL		100%	100%	100%	100%	100%

* Includes students in the "Extended-time Algebra" program.

The results in Table 4 show that the final examination passing rates in the Honors sections exceed those in the regular sections by 24 percentage points (in English 1) to 50 percentage points (in Biology). The overall racial/ethnic group differences in final examination passing rates noted in Table 4 also appear within the regular and Honors groups. Racial/ethnic group enrollments among the regular and Honors sections also are quite disparate. In Geometry, for example, the numbers of Asian American students in the Honors and regular groups are very similar, but the Honors group among African American or Hispanic students is only about 20 percent of the number in the regular group. Or, in NSL for example, the number of white students in the Honors group

exceeds the number of white students in the regular group by 81 percent (3,544 versus 1,957); whereas the number of African American students in the Honors group is only 43 percent of the number of African American students in the regular group (766 versus 1,793). Honors sections in Algebra 1 are omitted here because they are not provided in high schools.

Table 4
**Passing Rates Among High School Students Taking Final Examinations in
 Four Courses in Regular and Honors Classes for Semester 1, January 2003**

	Number Tested	6,704	3,367	5,753	5,067	5,055	5,326	5,576	5,780

Final examinations for Algebra 1 and Geometry are given in middle school, and those results are shown in Table 5. Students who are better prepared academically are typically able to take the courses earlier in their school careers than those who are less well prepared, and the final examination passing rates in middle school reflect, in part, those higher academic performance levels. For example, the final examination passing rate among the middle school algebra-takers was 93.3 percent compared with the passing rate of 52 percent among ninth grade algebra-takers and 21 percent among tenth grade algebra-takers (see Attachments 1 and 4 for these details by grade level). Racial/ethnic group differences in final examination passing rates are smaller among the middle school students taking Algebra 1 or Geometry than among those taking Algebra 1 in high school.

Table 5

Passing Rates Among Middle School Students Taking Final Examinations in
Two Courses for Semester 1, January 2003

		Algebra 1A	Geometry A
Asian American	% Passed	96.0%	98.5%
	Number Tested	1,184	274
African American	% Passed	81.5%	92.8%
	Number Tested	725	69
White	% Passed	96.5%	98.7%
	Number Tested	3,555	742
Hispanic	% Passed	82.8%	95.9%
	Number Tested	546	49
TOTAL	% Passed	93.3%	98.1%
	Number Tested	6,010	1,134

ATTACHMENT 1

District Summary of Enrollment and Pass Rate on Final Examinations First Semester, Year 2002-03, Grades 9 through 12

NOTE: Data cells with fewer than 5 cases have been omitted to protect the confidentiality of individuals. Also, the tables in Attachments 1 through 6 show the students passing the examinations as a percentage of all students enrolled in the courses. That is, “exempted” examinations as counted as not passing. An analysis of the final examination data from June 2002 showed, for example, that the HSA average score for the students exempted from the Algebra 1A final examination was very close to the HSA average score of students who took the final examination and obtained a failing grade.
