2003 Maryland High School Assessment Results for the Montgomery County Public Schools

In August 2003 the Maryland State Board of Education (MSDE) adopted passing standards for the Maryland High School Assessments (HSA) in algebra/data analysis, biology, English 1, and Government. (See Table A-1 in the appendix) In December 2003, the MSDE released the 2003 HSA results for the state, school systems, and individual schools. MSDE also released recalculated 2002 results based on the adopted passing standards.¹ This report presents the results of the 2003 administration of the four HSAs and summarizes the performance of the Montgomery County Public Schools (MCPS) on these four end-of-course assessments.²

Currently, the Code of Maryland Regulations (COMAR) stipulates that Maryland students who complete one of the HSA courses must take the corresponding HSA as a graduation requirement. Students are not yet required to pass the HSAs to receive a diploma. MSDE voted in December 2003 to make passing the HSAs a requirement, beginning with students who will graduate in 2009 (current Grade 7 students).

Students who take one of the HSA courses in high school or middle school take the corresponding HSA when they complete the course. The HSAs were administered twice in 2003. The January administration provided an opportunity for students who already had completed one or more of the HSA courses but who had not taken the HSA the test(s).³ Most students participated in the May administration when they were completing one or more HSA courses.

Systemwide Results

Table 1 shows the performance of MCPS students on each of the HSAs in 2002 and 2003. The percentage of MCPS students who earned a passing score on each of the 2003 HSAs ranged from 56.3% on the English 1 examination to 77.3% on the Government examination. Compared with 2002, more MCPS students took each of the assessments in 2003. The percentage of students earning a passing score on the Government assessment increased by 5.1 percentage points over the 2002 results. On the other three assessments, the percentage of students earning a passing score declined from 0.9 to 5.4 percentage points, compared with 2002 results.

Table 1

¹ 2002 was the first year in which MSDE reported results on the HSAs. Results were reported as scale scores and state percentiles.

² The geometry end-of-course assessment was changed from an HSA to a Maryland School Assessment (MSA) by MSDE.

³ One MCPS school, Paint Branch High School, offered a double-period biology course in fall semester. Students in that course took the biology HSA in January when they completed the course.

MCPS Students Earning Passing Scores on HSAs, 2002 and 2003

Subject	# Tested 2002	# Tested 2003 ⁴	Change in # Tested 2002–2003	% Earning Passing Score 2002	% Earning Passing Score 2003	Change in % Earning Passing Score 2002–2003

Government	9,566	10,785	+1219	72.2	77.3	+5.1

Table 2 shows the percentage of MCPS test takers in each racial/ethnic group who earned a passing score in 2003 on each of the HSAs. A substantial achievement gap exists on each of the tests. The percentage of African American and Hispanic students earning passing scores ranges from approximately 31 percentage points lower than their Asian American and white counterparts on the Government test to 44 percentage points lower on the Algebra test. A comparison of the 2002 and 2003 percentage of students earning passing scores for each racial/ethnic group is found in Table A-2 of the appendix.

Table 2
MCPS Students Earning Passing Scores on HSAs by Racial/Ethnic Group, 2003

Subject	Percentage Earning Passing Score				
	African American	Asian American	Hispanic	White	All Students
Algebra	41.0	81.9	41.9	83.7	67.1
Biology	49.8	83.4	45.4	85.0	71.3
English 1	28.2	68.7	31.6	71.9	56.3
Government	62.3	84.3	56.6	88.0	77.3

Table 3 shows the percentage of special education students, students with limited English proficiency (LEP), and students participating in the Free and Reduced-price Meals System who earned a passing score on each of the four HSAs in 2003. A comparison of the 2002 and 2003 percentage of students earning passing scores in each of these groups is found in Table A-3 of the appendix.

⁴ Includes both the January and May 2003 administrations.

Table 3
MCPS Students Earning Passing Scores on HSAs by Special Services, 2003

Subject	Percentage Earning Passing Scores		
	Free and Reduced Price Meals System	Special Education	Limited English Proficient
Algebra	41.4	31.4	26.3
Biology	42.7	34.0	25.6
English 1	24.8	16.9	8.1
Government	53.1	41.5	36.2

Results for individual schools disaggregated by racial/ethnic group and special services are found in A-5, the High Schools section of the appendix.

Comparison with State

Table 4 compares the percentages of test takers statewide and in selected counties that earned a passing score on each assessment in 2003. Statewide, the percentage of students who passed an HSA ranged from a low of 39.8% in English 1 to a high of 60.2% on the Government test. The percentage of MCPS students who earned a passing score on each HSA exceeds the statewide results by 14–17 percentage points. Of the counties shown in Table 4, only Howard County exceeded MCPS in the percentage of students earning a passing score on each HSA.

Table 4
Percentage of Students Earning Passing Scores on HSAs Statewide and in Selected Counties, 2003

Subject	Anne Arundel	Baltimore	Frederick	Howard	Prince George's	MCPS	Maryland
Algebra	55.6	57.9	64.2	69.4	28.1	67.1	53.2
Biology	58.2	52.8	63.7	73.3	31.1	71.3	54.3
English 1	40.6	36.8	45.3	61.5	23.2	56.3	39.8
Government	59.6	60.3	64.5	78.5	41.0	77.3	60.2

Conclusion

Based on the results from the 2003 administrations of the four HSAs, a higher percentage of MCPS students earned passing scores on each HSA than was true statewide. Compared with the 2002 results, the percentage of MCPS students who earned a passing score rose on the Government test and dropped on the others. For the 2002 and 2003 HSAs, MSDE has provided school systems with only an overall score for each student. Subscores that would allow staff to

identify specific areas of strength and weakness are not available. MSDE has indicated that more detailed information, which is critical for instructional planning, will be provided in future years. Without this detailed information, it is difficult to speculate about why the percentage of students earning a passing score has changed from year to year.

It is important to note that student motivation may have had a substantial impact on the HSA results. Students are aware that, currently, they do not have to pass any of the HSAs in order to earn a diploma. The only requirement at this time is that students completing an HSA course take the corresponding assessment. Also, the HSAs do not have an impact on student course grades. Most students taking the HSAs in January should have taken the assessments several months earlier, when they finished the course.⁵

⁵ Currently, the HSAs are given twice a year, in January and in May. Students completing a course in summer school must wait until January to take the assessment.
