Reversals in Film

Directions: Circle the scenario that is NOT a reversal and add a sentence or two to create a reversal.

1) A child cries and the mother comes to see what is wrong.

2) A very serious teacher demands his students work quietly. He opens his desk drawer and out jumps a monkey.

3) A boy takes a short cut through a construction site. As he crawls through the fence opening, he doesn't see the sign: "Keep Out. Attack Dog."
